

Datasheet: 0100-0220

BATCH NUMBER 160115

Description:	MOUSE ANTI HUMAN CD140a
Specificity:	CD140a
Other names:	PDGF RECEPTOR ALPHA
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	35248 (57/20)
Isotype:	IgG1
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Immunohistology - Paraffin	▪			10µg/ml - 20µg/ml
ELISA	▪			0.5 µg/ml - 1 µg/ml
Western Blotting (1)	▪			1 µg/ml - 2 µg/ml
Immunofluorescence	▪			
Functional Assays (2)			▪	

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using the appropriate negative/positive controls.

(1)This antibody recognizes CD140a under non-reducing conditions.

(2)Removal of Sodium Azide is recommended prior to use in functional assays. The use of [EQU003](#) is recommended for this purpose.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein G
Buffer Solution	Phosphate buffered saline
Preservative	0.09% Sodium Azide (NaN ₃)

Stabilisers	5% Trehalose
Approx. Protein Concentrations	1.0 mg/ml
Immunogen	Purified recombinant human platelet-derived growth factor (PDGF) receptor alpha (extracellular domain), derived from the insect cell line Sf21.

RRID	AB_2162480
Specificity	<p>Mouse anti Human CD140a antibody, clone 35248 recognizes the human platelet-derived growth factor receptor alpha, a 1089 amino acid, ~180 kDa single pass type I transmembrane glycoprotein.</p> <p>PDGF is a major serum mitogen that can exist as a homo- or heterodimeric protein consisting of disulphide-linked PDGF-A and PDGF-B chains (Hart et al. 1990). The PDGF-AA, PDGF-BB and PDGF-AB isoforms have been shown to bind to two distinct cell surface PDGF receptors with different affinities. Whereas PDGF receptor alpha binds all three isoforms with high affinity, PDGF R beta binds PDGF-BB and AB but not PDGF-AA (Hart et al. 1988). Both PDGF receptor alpha and beta are members of the class III subfamily of receptor tyrosine kinases (Westermarck 1995).</p> <p>Mouse anti Human CD140a antibody, clone 35248 has been reported for use in functional studies. The ND50 was determined as 0.2-0.6 µg/ml for blocking 10 ng/ml of PDGF-AA biological activity on a quiescent confluent cell culture of human WS1 cells.</p>
