

Datasheet: 0100-0529

Description:	MOUSE ANTI FOLATE BINDING PROTEIN
Specificity:	FOLATE BINDING PROTEIN
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	SF64 (BGN/1210/64)
Isotype:	IgG1
Quantity:	0.2 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
ELISA	▪			
Western Blotting			▪	

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using the appropriate negative/positive controls.

Target Species	Bovine
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein G from ascites
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	<0.1% Sodium Azide (NaN ₃)
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml
Immunogen	Folate binding protein isolated from bovine milk.

Specificity **Mouse anti Bovine folate binding protein antibody, clone SF64** recognizes bovine folate binding protein from milk. Cross reactivity with folate binding proteins from other sources has not been determined.
Soluble folate binding protein from milk serves to accumulate and stabilize reduced folate compounds in the milk and aid in the absorption of folates by the intestinal mucosa of neonates.

2. Jones, M.L. & Nixon, P.F. (2002) Tetrahydrofolates are greatly stabilized by binding to bovine milk folate-binding protein. [J Nutr. 132 \(9\): 2690-4.](#)

Storage This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.

Guarantee 12 months from date of despatch
