

Datasheet: 0400-0063 BATCH NUMBER 148332

Description:	MOUSE ANTI ADENOVIRUS HEXON
Specificity:	ADENOVIRUS HEXON
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	1431 (2C4)
lsotype:	lgG1
Quantity:	0.2 mg

Product Details

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> .

Target Species	Viral				
Product Form	Purified IgG - liquid				
Preparation	Purified IgG prepared by affinity chromatography on Protein A				
Buffer Solution	Phosphate buffered saline				
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)				
Approx. Protein Concentrations	0.1 mg/ml				
Immunogen	ATCC VR5 virus.				
RRID	AB_618867				

Specificity	Mouse anti Adenovirus hexon antibody, clone 1431 recognises the penton or hexon group antigen present in most adenovirus serotypes.					
	Hexon protein is a major coat protein of adenoviruses. Adenov principal protein components: the hexon, the penton, and the fi three subunits together forming two major components of differ symmetry. A triangular top with three towers of density is super pseudo hexagonal base.	ber. Hexon consists of ent morphological				
Storage	Store at +4°C or at -20°C if preferred. Storage in frost-free freezers is not recommended. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.					
Guarantee	12 months from date of despatch					
Health And Safety Information	Material Safety Datasheet documentation #10040 available at: https://www.bio-rad-antibodies.com/SDS/0400-0063 10040					
Regulatory	For research purposes only
