

Datasheet: 0650-0050

BATCH NUMBER 155315

Description:	MOUSE ANTI HUMAN APOLIPOPROTEIN A1
Specificity:	APOLIPOPROTEIN A1
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	G2
Isotype:	IgG1
Quantity:	0.5 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Immunohistology - Frozen	▪			1/40
Immunohistology - Paraffin			▪	
ELISA	▪			1/5000
Western Blotting	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using the appropriate negative/positive controls.

Target Species	Human
Product Form	Purified IgG - lyophilised
Reconstitution	Reconstitute with 1.0ml distilled water Care should be taken during reconstitution as the protein may appear as a film at the bottom of the vial. Bio-Rad recommend that the vial is gently mixed after reconstitution.
Preparation	Purified IgG prepared by affinity chromatography on Protein A from ascites
Buffer Solution	0.01M Sodium Phosphate 0.01M Sodium Borate 0.15M Sodium Chloride

Preservative	1% Dextran
Stabilisers	1% Mannitol
Immunogen	Native Apolipoprotein-A1 from human plasma
External Database Links	<p>UniProt: P02647 Related reagents</p> <p>Entrez Gene: 335 APOA1 Related reagents</p>
RRID	AB_620040
Specificity	<p>Mouse anti Human Apolipoprotein A1, clone G2 recognizes Apolipoprotein A-1 (also known as Apo-A1) , a lipid-binding protein which enables the transport of dietary lipids for storage, metabolism and secretion. Apo-A1 plays an important part in the removal of cholesterol from cells.</p> <p>Mouse anti Human Apolipoprotein A1, clone G2 reacts with both free human Apo-A1 and High Density Lipoprotein (HDL) bearing Apo-A1, but does not cross-react with ApoE, ApoB or Albumin.</p>
ELISA	This antibody is suitable for coating microtitre plates in a sandwich ELISA using catalogue number 0650-0190 for detection.

Storage	<p>Prior to reconstitution store at +4°C. After reconstitution store at -20°C. Storage in frost-free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody.</p>
Guarantee	Guaranteed until date of expiry. Please see product label.
