

Datasheet: 2222-8354 BATCH NUMBER 160614

Description:	SHEEP ANTI HUMAN C5
Specificity:	C5
Other names:	COMPLEMENT COMPONENT 5
Format:	Ig Fraction
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	1 ml

Product Details

	system using the approp	riate nega	ative/posit	ive controls.				
Target Species	Human							
Product Form	lg fraction - liquid							
Preparation	lg fraction prepared by io	n exchan	ge chrom	atography				
Buffer Solution	Glycine buffered saline							
Preservative	0.09% Sodium Azide (Na	aN ₃)						
Stabilisers	0.1% E-amino-n-caproid	c acid (EA	ACA)					
	0.01% Benzamidine	`	•					
	1 mM ethylenediaminete	traacatio	acid (ED	ΤΔ١				
		รแลลปอเเป						
Immunogen	Human C5, purified from	plasma.

Specificity	 Sheep anti human C5 polyclonal antibody recognizes complement component 5 (C5), a member of the complement system. The complement system consists of a tightly regulated network of proteins. Its activation leads to a sequential cascade of enzymatic reactions, resulting in opsonisation of the pathogens and their removal by phagocytes, as well as cell lysis. Three pathways have been described, the antibody-dependent pathway (classical pathway), the alternative pathway and the lectin activation pathway (<u>Ehrnthaller et al. 2011</u>, <u>Nesargikar et al. 2012</u>). The complement system plays a critical role in both innate and adaptive immune responses. It is also involved in tissue regeneration, tumor growth and some human pathologies (<u>Sarma et al. 2011</u>). Complement component 5 is the initiator of the effector terminal phase of the complement system. C5 convertase cleaves C5 into C5a, a potent anaphylatoxin, and C5b, ultimately resulting in the formation of the multimeric membrane attack complex (MAC) together with the other components of the terminal pathway (C5b-C9) (<u>Noris et al. 2013</u>). Sheep anti human polyclonal antibody gives a single arc when tested by immunoelectrophoresis (IEP) against human plasma. The identity has been confirmed by 						
Storage	Store at +4°C or at -20°C if preferred. Storage in frost-free freezers is not recommended. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody.						
Guarantee	18 months from date of despatch.						
Health And Safety Information	Material Safety Datasheet documentation #10087 available at: https://www.bio-rad-antibodies.com/SDS/2222-8354 10087						
Regulatory	For research purposes only
