

## Datasheet: 2470-5416

<b>Description:</b>	MOUSE ANTI CYTOMEGALOVIRUS gB LATE CYTOPLASMIC ANTIGEN
<b>Specificity:</b>	CYTOMEGALOVIRUS gB LATE CYTOPLASMIC ANTIGEN
<b>Other names:</b>	CMV
<b>Format:</b>	Purified
<b>Product Type:</b>	Monoclonal Antibody
<b>Clone:</b>	hCMV34
<b>Isotype:</b>	IgG2a
<b>Quantity:</b>	0.2 mg

## Product Details

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

	Yes	No	Not Determined	Suggested Dilution
Immunohistology - Frozen (1)	▪			
ELISA	▪			
Immunofluorescence	▪			0.02 µg/slide - 1 µg/slide

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using the appropriate negative/positive controls.

**(1) Reactive only in acetone fixed CMV infected cells or frozen sections.**

<b>Target Species</b>	Viral
<b>Product Form</b>	Purified IgG - liquid
<b>Preparation</b>	Purified IgG prepared by affinity chromatography on Protein G
<b>Buffer Solution</b>	Phosphate buffered saline
<b>Preservative Stabilisers</b>	0.09% Sodium Azide (NaN <sub>3</sub> )
<b>Carrier Free</b>	Yes
<b>Approx. Protein Concentrations</b>	IgG concentration 1.0 mg/ml
<b>Immunogen</b>	Native cytomeglaovirus extracts from infected human cells..
<b>Specificity</b>	<b>Mouse anti Cytomegalovirus gB Late Cytoplasmic Antigen antibody, clone hCMV34 detects</b>

cytomegalovirus glycoprotein B late cytoplasmic antigen. Cytomegalovirus is an enveloped double stranded DNA virus which in humans (HCMV) is commonly known as human herpesvirus 5 (HHV-5).

Glycoprotein B (gB) is the main antigenic protein within the envelope of HCMV. It is required for HCMV mediated membrane fusion along with the gH / gL complex. The unprocessed precursor of HCMV gB is 906 amino acids in length, with a MW of approximately 100kDa.

Mouse anti Cytomegalovirus gB Late Cytoplasmic Antigen antibody, clone hCMV34 does not react with HSV, VZV or EBV. Reacts with MRC-5 infected cells, but not uninfected cells.

Mouse anti Cytomegalovirus gB Late Cytoplasmic Antigen antibody, clone hCMV34 has been used successfully to demonstrate presence of CMV in infected cells by immunofluorescence on paraformaldehyde fixed cell cultures ([González-Sánchez et al 2015](#)).

---

**Storage** Store at +4°C or at -20°C if preferred.  
Storage in frost-free freezers is not recommended.  
This product should be stored undiluted.  
Avoid repeated freezing and thawing as this may denature the antibody.  
Should this product contain a precipitate we recommend microcentrifugation before use.

---

**Guarantee** 18 months from date of despatch.

---

**Health And Safety Information** Material Safety Datasheet documentation #10040 available at:  
10040: <https://www.bio-rad-antibodies.com/uploads/MSDS/10040.pdf>

---

**Regulatory** For research purposes only
