

Datasheet: 4010-7009

Description:	MOUSE ANTI EDWARDSIELLA TARDA
Specificity:	EDWARDSIELLA TARDA
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	236/128
Isotype:	IgG1
Quantity:	0.2 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
ELISA	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using the appropriate negative/positive controls.

Target Species	Bacterial
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Carrier Free	Yes
Approx. Protein Concentrations	1.0 mg/ml
Immunogen	Native <i>Edwardsiella tarda</i> preparation.

Specificity **Mouse anti *Edwardsiella tarda* antibody, clone 236/128** recognizes *Edwardsiella tarda*.

E. tarda is a member of the family *Enterobacteriaceae* associated with freshwater ecosystems and is a causative agent of gastroenteritis, wound infections and death due to septicaemia. It is thought that the pathogenicity of this bacteria is due to its ability to resist phagocytic killing by the host defences. Replication of *E. tarda* in murine macrophages is dependant on the type III secretion system and induces an anti-apoptotic effect by up-regulating anti-apoptotic NF-kB target genes.

References 1. Hong, S.R. *et al.* (2009) Development of QCM biosensor to detect a marine derived pathogenic bacteria *Edwardsiella tarda* using a novel immobilisation method. [Biosens Bioelectron. 24: 1635-40.](#)

Storage This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.

Guarantee 12 months from date of despatch
