

Datasheet: 4050-0096

**BATCH NUMBER 164762**

|                      |                           |
|----------------------|---------------------------|
| <b>Description:</b>  | MOUSE ANTI HUMAN ELASTASE |
| <b>Specificity:</b>  | ELASTASE                  |
| <b>Other names:</b>  | ELA2                      |
| <b>Format:</b>       | Purified                  |
| <b>Product Type:</b> | Monoclonal Antibody       |
| <b>Clone:</b>        | ELA10-101.5 (39A)         |
| <b>Isotype:</b>      | IgG1                      |
| <b>Quantity:</b>     | 0.2 mg                    |

## Product Details

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

|                            | Yes | No | Not Determined | Suggested Dilution |
|----------------------------|-----|----|----------------|--------------------|
| Flow Cytometry             | ▪   |    |                |                    |
| Immunohistology - Frozen   |     |    | ▪              |                    |
| Immunohistology - Paraffin |     |    | ▪              |                    |
| ELISA                      | ▪   |    |                |                    |
| Western Blotting           |     |    | ▪              |                    |
| Immunofluorescence         |     |    | ▪              |                    |
| Functional Assays          | ▪   |    |                |                    |

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using the appropriate negative/positive controls.

|                        |  |
|------------------------|--|
| <b>Target Species</b>  | Human  |
| <b>Product Form</b>    | Purified IgG - liquid  |
| <b>Preparation</b>     | Purified IgG prepared by affinity chromatography on Protein G from ascites |
| <b>Buffer Solution</b> | Phosphate buffered saline  |
| <b>Preservative</b>    | <0.1% Sodium Azide (NaN <sub>3</sub> )                                     |

## Stabilisers

---

**Approx. Protein Concentrations** 0.5 mg/ml

---

**Immunogen** Elastase from human neutrophils.

---

### Specificity

**Mouse anti Human elastase antibody, clone 39A** recognizes human neutrophil elastase, also known as elastase-2, Bone marrow serine protease, PMN elastase or Medullasin. Elastase is a 238 amino acid ~27 kDa enzyme with an additional 29 amino acid signal and pro-peptide region. Mutations of the ELA2 gene can lead to a number of hematopoietic disorders including cyclic hematopoiesis ([CH](#)) characterized by a 21 day cycle of bone marrow derived blood cell production with neutrophil numbers ranging between normal levels and almost zero ([Horwitz et al. 1999](#)) and severe congenital autosomal neutropenia ([SCN1](#)) demonstrating developmental arrest of granulopoiesis at the promyelocyte stage ([Bellanné-Chantelot et al. 2004](#)) with both conditions leading to a predisposition to bacterial infections..

### Storage

This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.
