Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

### Target Species

Rabbit

### Species Cross Reactivity

Does not react with: Mouse, Human

### Product Form

Purified Ig conjugated to Fluorescein Isothiocyanate Isomer 1 (FITC) - liquid

### Max Ex/Em

Fluorophore	Excitation Max (nm)	Emission Max (nm)
FITC	490	525

### Antiserum Preparation

Antisera to rabbit IgG (H+L) were raised by repeated immunisations of goats with normal rabbit IgG. Purified IgG was prepared from whole serum by affinity chromatography on pooled rabbit IgG covalently linked to agarose. The preparation has been cross absorbed against human and mouse sera and purified paraproteins to minimise potential cross

reactivity.

**Storage** This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended. This product is photosensitive and should be protected from light.
