

Datasheet: 5355-2657

Description:	MOUSE ANTI HUMAN INTEGRIN ALPHA V BETA 5
Specificity:	INTEGRIN ALPHA V BETA 5
Other names:	CD51
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	P1F6
Isotype:	IgG1
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			
Immunohistology - Frozen	▪			
ELISA	▪			
Immunoprecipitation	▪			
Immunofluorescence	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using the appropriate negative/positive controls.

Target Species	Human
Species Cross Reactivity	<p>Reacts with: Chicken</p> <p>N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.</p>
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein A from ascites
Buffer Solution	Phosphate buffered saline

Preservative Stabilisers	0.1% Sodium Azide (NaN ₃)
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml
Immunogen	Human UCLA P3 cells (lung carcinoma).

Synonyms	MSK8, VNRA
RRID	AB_620176
Specificity	Mouse anti Human integrin alpha V beta 5 antibody, clone P1F6 recognizes the integrin alpha V beta 5 holomolecule. ITGaVb5 acts as a receptor for fibronectin and has also been co-opted as a cellular receptor for adenovirus type C (Lyle and McCormick 2010).
Immunohistology	For use on human carcinomas, normal epithelium and keratinocytes using acetone or paraformaldehyde fixed tissue sections.

A. <i>et al.</i> (1991) Integrins alpha v beta 3 and alpha v beta 5 contribute to cell attachment to vitronectin but differentially distribute on the cell surface J Cell Biol 113: 919 - 929
Storage	<p>This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.</p> <p>Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.</p>
Guarantee	12 months from date of despatch
