

## Datasheet: 6400-2227 BATCH NUMBER 161423

Description:	RABBIT ANTI MYCOPLASMA PNEUMONIAE:Biotin
Specificity:	MYCOPLASMA PNEUMONIAE
Format:	Biotin
Product Type:	Polyclonal Antibody
lsotype:	Polyclonal IgG
Quantity:	1 ml

## **Product Details**

Applications	This product has been re derived from testing withi communications from the information. For general	n our lab originato	oratories, p ors. Please	peer-reviewed publica refer to references in	ations or personal ndicated for further		
	•		coominent		<u></u>		
	rad-antibodies.com/proto	Yes	No	Not Determined	Suggested Dilution

	Where this product has n	iot been t	ested for u	ise in a particular tech	nnique this does not		
	necessarily exclude its use in such procedures. Suggested working dilutions are given as						
	a guide only. It is recommended that the user titrates the product for use in their own						
	system using the approp	riate nega	ative/positi	ve controls.			
Target Species	Bacterial						
Species Cross Reactivity	Does not react with:Hum	an, Bovin	е				
Product Form	Purified IgG conjugated t	o Biotin -	liquid				
Buffer Solution	Phosphate buffered salin	e					
Preservative Stabilisers	0.1% Sodium Azide (NaN	۱ <sub>3</sub> )					
Approx. Protein Concentrations	IgG concentration 4.0 mg	j/ml					

RRID		AP 610952
KKID		AB_619852
Specificit	ty	<b>Rabbit anti</b> <i>Mycoplasma pneumoniae</i> antibody recognises <i>M. pneumoniae</i> , a bacterium which is distinguished phenotypically from other bacteria by lacking a peptidoglycan cell wall. <i>M. pneumoniae</i> is exclusively a human pathogen, and primaril attaches to mucosa in the upper and lower respiratory tract. It is transmitted by respiratory droplets, and infection can cause bronchial asthma, bronchitis and pneumoniae. Centra nervous system (CNS) manifestations are the most frequent extrapulmonary complications, and include encephalitis, aseptic meningitis, cerebellar ataxia, and myet
		Rabbit anti <i>Mycoplasma pneumoniae</i> antibody has not been cross absorbed and may react with related microorganisms.
Storage		
Clorage		This product is shipped at ambient temperature. It is recommended to aliquot and stor -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C short term use (up to 4 weeks) and store the remaining aliquots at -20°C. Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.
Guarante	•e	-20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C short term use (up to 4 weeks) and store the remaining aliquots at -20°C.
