

## Datasheet: 642008

Description:	DONKEY ANTI GOAT IgG (H/L):Biotin (RAT/MOUSE ADSORBED)
Specificity:	IgG (H/L)
Format:	Biotin
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	1 mg

## **Product Details**

communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.   rad-antibodies.com/protocols.   Yes No   Not Determined Suggested Dilution   Immunohistology - Frozen •   ELISA •   Vhere this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.   Target Species Goat   Species Cross Reactivity Does not react with:Mouse, Rat   Product Form Purified IgG conjugated to Biotin - liquid   Antiserum Preparation Antisera to Goat IgG were raised by repeated immunisations of donkeys with highly purified antigen. Purified IgG was prepared from whole serum by affinity chromatography.   Buffer Solution Phosphate buffered saline	Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-</u>					
rad-antibodies.com/protocols.   Yes No Not Determined Suggested Dilution   Immunohistology - Frozen • 1/5,000 - 1/20,000   Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.   Target Species Goat   Species Cross Does not react with:Mouse, Rat   Product Form Purified IgG conjugated to Biotin - liquid   Antiserum Preparation Antisera to Goat IgG were raised by repeated immunisations of donkeys with highly purified antigen. Purified IgG was prepared from whole serum by affinity chromatography.

Immunogen Goat IgG.	Immunogen	Goat IgG.					

RRID	AB_619839
Specificity	<b>Donkey anti Goat IgG antibody</b> recognizes the heavy and light chains of goat IgG as demonstrated by ELISA. The preparation has minimal cross reaction with rat and mouse serum proteins, however, it may react with the light chains of other goat immunoglobuling

Storage	This product is shipped at ambient temperature. It is recommended to aliquot and store a -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.
	Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.
Guarantee	Guaranteed for 12 months from the date of despatch or until the date of expiry, whicheve comes first. Please see label for expiry date.
