Specificity	Sheep anti Human Neuropeptide Y Receptor 1 antibody recognizes human neuropeptide Y receptor 1. Neuropeptide Y receptors are a class of G-protein coupled receptors which are activated by the closely related peptide hormones neuropeptide Y, peptide YY and pancreatic polypeptide. These receptors are involved in control of a diverse set of behavioral processes including appetite, circadian rhythm, and anxiety.
Western Blotting	6732-0150 detects a band of approximately 55 kDa in human brain.
