

## Datasheet: 7370-9902 BATCH NUMBER 180821

Description:	NATIVE RABBIT PHOSPHORYLASE B
Name:	PHOSPHORYLASE B
Format:	Purified
Product Type:	Purified Protein
Quantity:	25 mg

## **Product Details**

Applications	This product has been reported to work in the following applications. This information derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-</u> rad-antibodies.com/protocols.						
		Yes	No	Not Determined	Suggested Dilution		
	ELISA  • Where this product has not been tested for use in a particular technique this does not						
	necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.						
Target Species	Rabbit						
Product Form	Purified enzyme from rabbit skeletal muscle - liquid						
Preservative Stabilisers	None present						
Approx. Protein Concentrations	5.0 mg/ml						
Product Information	Native Rabbit Phosphorylase B is a member of the protein kinase superfamily. Phosphorylases catalyse the breakdown of glycogen in liver and muscle. The phosphorylase of skeletal muscle occurs in two forms, the active form (phosphorylase-a) and a much less active form (phosphorylase b). Phosphorylase b has a molecular weight of approximately 185kDa.						
Activity	55-60 U/mg protein						
	One unit will liberate one $\mu M$ of glucose-1-phosphate from glycogen and orthophospha per minute at 37°C and pH 6.8.				en and orthophosphate		

Purity		Protein: 95%							
Further F	Reading	1. Fischer, E.H. and k muscle phosphorylas	stallization of rabbit skeletal						
Storage		Store at -20°C only.							
		Storage in frost-free freezers is not recommended.							
		zing and thawing as this may te we recommend							
Guarante	e	12 months from date
