

Datasheet: 7820-0504 **BATCH NUMBER 168691**

Description:	NATIVE HUMAN PROSTATE SPECIFIC ANTIGEN
Name:	PROSTATE SPECIFIC ANTIGEN
Other names:	KALLIKREIN 3
Format:	Purified
Product Type:	Purified Protein
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
ELISA	•			
Western Blotting	-			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using the appropriate negative/positive controls.

External Database Links	UniProt:
Approx. Protein Concentrations	1.0 mg/ml
Preservative Stabilisers	<0.1% Sodium Azide (NaN ₃)
Buffer Solution	Phosphate buffered saline
Preparation	Sterlie filtered through a 0.2 μM membrane
Product Form	Purified protein from human seminal fluid - liquid
Target Species	Human

Synonyms	APS
Synonyms	AFS
Product Information	Native Human prostate specific antigen preparation is a purified form of human prostate-specific antigen (PSA), a glycoprotein of ~30 kDa found mainly in prostatic tissue and seminal fluid. PSA is also present in small quantities in the serum of normal men and is often elevated in the presence of prostate cancer and in other prostatic disorders.
	Native Human prostate specific antigen demonstrates high specific activity and low levels of any contaminating proteins, including those with trypsin-like protease activity (Manning et al. 2012).
Protein Molecular Weight	30 kDa
Purity	>96% by SDS-PAGE

Storage	This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.
	Avoid repeated freezing and thawing as this may denature the protein. Storage in frost-free freezers is not recommended.
Guarantee	12 months from date of despatch

Health And Safety Information

Material Safety Datasheet documentation #10258 available at:

https://www.bio-rad-antibodies.com/SDS/7820-0504

10258

Donor material tested and found negative for HIV1 and 2 antibodies, HBsAg and HCV

antibodies.

As no test can completely guarantee this material to be free of pathogens it should be

handled as potentially infectious
