**Specificity** **Mouse anti Testosterone antibody, clone BGN/3G8A4** recognizes testosterone, a steroid hormone and most potent of the naturally occurring androgens.

Testosterone promotes the development and maintenance of male secondary sex characteristics and is produced primarily in the testes, but is also produced in small amounts by the adrenal glands, ovaries and placenta. Synthetic derivatives of testosterone are used therapeutically in the treatment of breast cancer and for hormone replacement therapy.

Mouse anti Testosterone antibody, clone BGN/3G8A4 also recognizes 5-a-Dihydrotestosterone (1%) and Androstenedione (1%).

**Storage** This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.
