

Datasheet: 8900-0700

| Description:  | MOUSE ANTI HUMAN THYROGLOBULIN |  |  |
|---------------|--------------------------------|--|--|
| Specificity:  | THYROGLOBULIN                  |  |  |
| Other names:  | Tg                             |  |  |
| Format:       | Purified                       |  |  |
| Product Type: | Monoclonal Antibody            |  |  |
| Clone:        | 5F9 (BGN/6E10)                 |  |  |
| Isotype:      | IgG2a                          |  |  |
| Quantity:     | 1 mg                           |  |  |
|               |                                |  |  |

### **Product Details**

### **Applications**

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <a href="www.bio-rad-antibodies.com/protocols">www.bio-rad-antibodies.com/protocols</a>.

|                            | Yes | No | Not Determined | Suggested Dilution |
|----------------------------|-----|----|----------------|--------------------|
| Flow Cytometry             |     |    |                |                    |
| Immunohistology - Frozen   |     |    |                |                    |
| Immunohistology - Paraffin |     |    |                |                    |
| ELISA                      | •   |    |                |                    |
| Western Blotting           |     |    |                |                    |

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using the appropriate negative/positive controls.

| Target Species                 | Human   |
|--------------------------------|---|
| Product Form                   | Purified IgG - liquid   |
| Preparation                    | Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant |
| Buffer Solution                | Phosphate buffered saline   |
| Preservative<br>Stabilisers    | <0.1% Sodium Azide (NaN <sub>3</sub> )  |
| Approx. Protein Concentrations | IgG concentration 1.0 mg/ml   |

| Entrez Gene:  7038 TG Related reagents  RRID AB_617397  Specificity Mouse anti Human Thyroglobulin antibody, clone 5F9 recognizes human thyroglobulin (Tg). Thyroglobulin is a 2768 amino acid ~670KDa homodimeric protein containing multiple thyroglobulin type 1 domains. Thyroglobulin is produced by the thyroid gland and is a precursor in the production of the thyroid hormones Triiodothyronine (T3) and Thyroxine (T4), important for regulating metabolic processes in the body (Uniprot: P01266).  Mutations in the thyroglobulin gene can lead to developmental and autoimmune diseases including Thyroid dyshormonogenesis 3 (Targovnik et al. 2010) and Autoimmune thyroid disease 3 (Ban et al. 2003).  Mouse anti Human Thyroglobulin antibody, clone 5F9 has been used successfully as a capture reagent in a sensitive sandwich ELISA for the detection of thyroglobulin in human serum and plasma samples.  ELISA 8900-0700 is suitable for use as a capture antibody in a sandwich ELISA.  Storage This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.  Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.  Guarantee 12 months from date of despatch  Material Safety Datasheet documentation #10040 available at: https://www.bio-rad-antibodies.com/SDS/8900-0700 10040 |             | UniProt:  |  |  |  |  |  |
