

## Datasheet: AAI32

<b>Description:</b>	SHEEP ANTI DOG IgG
<b>Specificity:</b>	IgG
<b>Format:</b>	Purified
<b>Product Type:</b>	Polyclonal Antibody
<b>Isotype:</b>	Polyclonal IgG
<b>Quantity:</b>	1 mg

## Product Details

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			▪	
Immunohistology - Frozen	▪			1/200 - 1/2000
Immunohistology - Paraffin			▪	
ELISA	▪			1/100 - 1/30000
Western Blotting	▪			1/1000 - 1/30000
Immunodiffusion	▪			

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using the appropriate negative/positive controls.

### Target Species

Dog

### Species Cross Reactivity

Reacts with: Raccoon dog, Sidestriped Jackal, Black-backed Jackal

**N.B.** Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.

### Product Form

Purified IgG - liquid

### Antiserum Preparation

Antisera to canine IgG were raised by repeated immunisation of sheep with highly purified antigen. Purified IgG prepared by affinity chromatography.

### Buffer Solution

Phosphate buffered saline

<b>Preservative Stabilisers</b>	0.09% Sodium Azide
<b>Approx. Protein Concentrations</b>	IgG concentration 1.0 mg/ml
<b>Immunogen</b>	Purified canine IgG.
<b>RRID</b>	AB_2278376
<b>Specificity</b>	<b>Sheep anti Dog IgG polyclonal antibody</b> recognizes canine IgG and shows no cross reactivity with other canine immunoglobulin classes in immunoelectrophoresis or ELISA. Sheep anti Dog IgG may cross react with IgG from other species. Cross reactivity has been demonstrated with the Raccoon Dog ( <i>Nyctereutes procyonoides</i> ), an early canid species ( <a href="#">Sukura et al. 2002</a> ) .
