

## Datasheet: AAM33B BATCH NUMBER 131015

Description:	GOAT ANTI MOUSE INTERLEUKIN-12:Biotin
Specificity:	IL-12
Format:	Biotin
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	50 μg

## **Product Details**

## **Applications**

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <a href="https://www.bio-rad-antibodies.com/protocols">www.bio-rad-antibodies.com/protocols</a>.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry				
Immunohistology - Frozen			•	
Immunohistology - Paraffin				
ELISA	-			0.25 - 1.0ug/ml
Western Blotting	-			0.1 - 0.2ug/ml

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using the appropriate negative/positive controls.

Target Species	Mouse	
Product Form	Purified IgG conjugated to Biotin - lyophilised	
Reconstitution	Reconstitute with 0.5ml sterile PBS containing 0.1% bovine see Care should be taken during reconstitution as the protein may bottom of the vial. Bio-Rad recommend that the vial is gently re-	appear as a film at the
Antiserum Preparation	Antisera to mouse IL-12 were raised by repeated immunisation purified antigen. Purified IgG was prepared from whole serum	• • •
Buffer Solution	Phosphate buffered saline	
Preservative Stabilisers	None present	

Carrier Free	Yes
Approx. Protein Concentrations	IgG concentration 0.1mg/ml after reconstitution.
Immunogen	Recombinant mouse IL-12.

RRID	AB_324598
Specificity	Goat anti Mouse Interleukin-12 antibody recognizes mouse interleukin-12 (IL-12).
	Interleukin-12 is produced by activated B lymphocytes and macrophages. The properties of IL-12 include the stimulation of growth of activated T lymphocytes and the development of TH1 CD4 +ve cells and CD8 +ve cytotoxic T cells.
