Target Species

Rat

Product Form

Purified IgG - lyophilised

Reconstitution

Reconstitute with 1.0 ml distilled water.

Care should be taken during reconstitution as the protein may appear as a film at the bottom of the vial. Bio-Rad recommend that the vial is gently mixed after reconstitution. For long term storage the addition of 0.09% sodium azide is recommended. N.B. For functional studies do not add sodium azide.

Antiserum Preparation

Antisera to rat IL-6 were raised by repeated immunisations of goats with highly purified antigen. Purified IgG was prepared from whole serum by affinity chromatography.
