<b>Specificity</b>	<p><b>Sheep anti Rat endothelin B receptor antibody</b> recognizes an epitope within the C-terminal (CT) region of endothelin B receptor (ET-B), a widely distributed transmembrane protein and member of the G-protein coupled receptor 1 family, which acts as a non-specific receptor for endothelin 1, 2, and 3, and mediates its action by G protein association and activation of a phosphatidylinositol-calcium second messenger system. Sheep anti Rat endothelin B receptor antibody (<b>AAR43</b>) recognizes epitopes on the cytoplasmic side of the receptor and therefore the cell membrane must be permeable to the antibody. AAR43 does not block the binding of endothelins.</p> <p>Sheep anti Rat endothelin B receptor antibody (<b>AAR43</b>) is suitable for use in immunocytochemistry on acetone fixed cells.</p>
<b>Storage</b>	<p>Store at +4°C. DO NOT FREEZE.</p> <p>This product should be stored undiluted. Should this product contain a precipitate we recommend microcentrifugation before use.</p>
