

Datasheet: AHP1005

**BATCH NUMBER 162118**

<b>Description:</b>	RABBIT ANTI ADIPONECTIN (C-TERMINAL)
<b>Specificity:</b>	ADIPONECTIN (C-TERMINAL)
<b>Other names:</b>	ADIPOQ
<b>Format:</b>	Purified
<b>Product Type:</b>	Polyclonal Antibody
<b>Isotype:</b>	Polyclonal IgG
<b>Quantity:</b>	0.1 mg

## Product Details

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			
Immunohistology - Frozen			▪	
Immunohistology - Paraffin (1)	▪			10ug/ml
ELISA			▪	
Immunoprecipitation			▪	
Western Blotting	▪			1 - 2ug/ml

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

**(1) This product requires antigen retrieval using heat treatment prior to staining of paraffin sections. Sodium citrate buffer pH 6.0 is recommended for this purpose.**

### Species Cross Reactivity

Reacts with: Human, Rat, Mouse

**N.B.** Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.

**Product Form** Purified IgG - liquid

**Antiserum Preparation** Antisera to Human Adiponectin (CT) were raised by repeated immunisations of rabbits

with highly purified antigen. Purified IgG prepared by affinity chromatography.

---

<b>Buffer Solution</b>	Phosphate buffered saline
------------------------	---------------------------

---

<b>Preservative Stabilisers</b>	0.02% Sodium Azide (NaN <sub>3</sub> )
---------------------------------	--

---

<b>Approx. Protein Concentrations</b>	IgG concentration 1.0mg/ml
---------------------------------------	----------------------------

---

<b>Immunogen</b>	A 15 amino acid peptide located near human Adiponectin carboxy-terminus.
------------------	--

---

---

<b>Synonyms</b>	ACDC, ACRP30, APM1, GBP28
-----------------	---------------------------

---

<b>RRID</b>	AB_609554
-------------	-----------

---

<b>Specificity</b>	<p><b>Rabbit anti Human adiponectin antibody</b> recognizes an epitope within the C-terminal region (CT) of the 244 amino acid protein adiponectin (also known as Acrp30), a major adipokine secreted into the bloodstream from adipose tissue to modulate metabolism, including glucose regulation and fatty acid catabolism.</p> <p>Unlike most other adipokines, Adiponectin is secreted exclusively by differentiating adipocytes at reduced levels during obesity. The serum level of Adiponectin is inversely correlated with BMI (body mass index) of an individual, and has an anti-inflammatory action, playing an important role in type II diabetes (insulin sensitivity) and atherosclerosis.</p>
--------------------	---

---

<b>Histology Positive Control Tissue</b>	Rat brain.
--	------------

---

<b>Western Blotting</b>	AHP1005 detects a band of approximately 26.4kDa in human HL60 cell lysates
-------------------------	--

---

<b>Storage</b>	This product is shipped at ambient temperature. It is recommended to aliquot and store at
----------------	---

-20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.

---

<b>Guarantee</b>	12 months from date of despatch
