

## Datasheet: AHP1066

Description:	GOAT ANTI SYK
Specificity:	SYK
Other names:	SPLEEN TYROSINE KINASE
Format:	Purified
Product Type:	Polyclonal Antibody
lsotype:	Polyclonal IgG
Quantity:	0.1 mg

### **Product Details**

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-</u> rad-antibodies.com/protocols.					
		Yes	No	Not Determined	Suggested Dilution	
	Flow Cytometry			•		
	Immunohistology - Frozen			•		
	Immunohistology - Paraffin			•		
	ELISA	-			1/16000	
	Immunoprecipitation			•		
	Western Blotting	-			1.0 - 3.0ug/ml	
	Functional Assays					
	Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.					
Target Species	Human					
Species Cross Reactivity	Based on sequence similarity, is expected to react with:Mouse, Dog, Rat <b>N.B.</b> Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.					
Product Form	Purified IgG - liquid					
Antiserum Preparat	ion Antisera to SYK were rai	sed by rep	peated im	munisations of goat w	ith highly purified	

antigen. Purified IgG prepared by affinity chromatography.

Buffer Solution	TRIS buffered saline			
Preservative Stabilisers	0.02% Sodium Azide (NaN <sub>3</sub> ) 0.5% Bovine Serum Albumin			
Approx. Protein Concentrations	IgG concentration 0.5mg/ml			
Immunogen	Peptide with sequence C-KYLQQNRHVKDKN from the internal region of the SYK sequence.			
External Database Links	UniProt: <u>P43405</u> <u>Related reagents</u> Entrez Gene: <u>6850</u> SYK <u>Related reagents</u>			
RRID	AB_2200254			
Specificity	<ul> <li>Goat anti Syk antibody detects an epitope within the internal region of SYK, a ~70 kDa non-receptor protein tyrosine kinase whose role differs in haematopoietic and non haematopoietic stem cells. In haematopoietic cells SYK is involved in the proximal signalling downstream of activated immunoreceptors (BCR, TCR, Fc receptors), thereby orchestrating a complex series of cellular responses such as cell proliferation, differentiation, survival and phagocytosis.</li> <li>In epithelial cells SYK appears to function as a negative regulator of related events. Furthermore, SYK has been shown to promote expression or secretion of inflammation-related molecules in lung epithelial cells.</li> <li>SYK appears to be required for vascular integrity during development, thus, manipulation of SYK function in endothelial cells could potentially modulate tumour-associated angiogenesis. SYK also has been shown to interact with Epstein-Barr virus LMP2A.</li> </ul>			
Western Blotting	AHP1066 detects a band of approximately 70kDa in human bone marrow, lymph node and spleen lysates.

Storage	This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C. Avoid repeated freezing and thawing as this may denature the antibody. Storage in			

	frost-free freezers is not recommended.	
Guarantee	12 months from date of despatch	
Health And Safety Information	Material Safety Datasheet documentation #10058 available at: https://www.bio-rad-antibodies.com/SDS/AHP1066 10058	
Regulatory	For research purposes only
