

Datasheet: AHP1081

**BATCH NUMBER 156778**

<b>Description:</b>	GOAT ANTI HUMAN MMP-7
<b>Specificity:</b>	MMP-7
<b>Other names:</b>	MATRILYSIN
<b>Format:</b>	Purified
<b>Product Type:</b>	Polyclonal Antibody
<b>Isotype:</b>	Polyclonal IgG
<b>Quantity:</b>	0.1 mg

## Product Details

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			▪	
Immunohistology - Frozen			▪	
Immunohistology - Paraffin			▪	
ELISA	▪			1/64000
Immunoprecipitation			▪	
Western Blotting	▪			0.03 - 0.1ug/ml

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

<b>Target Species</b>	Human
<b>Product Form</b>	Purified IgG - liquid
<b>Antiserum Preparation</b>	Antisera to human MMP7 were raised by repeated immunisations of goats with highly purified antigen. Purified IgG was prepared from whole serum by affinity chromatography.
<b>Buffer Solution</b>	TRIS buffered saline
<b>Preservative</b>	0.02% Sodium Azide
<b>Stabilisers</b>	0.5% Bovine Serum Albumin
<b>Approx. Protein</b>	IgG concentration 0.5 mg/ml

## Concentrations

---

**Immunogen** Peptide sequence C-QKLYGKRSNSRKK corresponding to the C-terminus of MMP7 (NP\_002414.1).

---

---

**Specificity** **Goat anti Huma MMP7 antibody** recognises matrix metalloproteinase 7 (MMP7), a ~30 kDa member of the MMP family. MMP's are secreted as inactive zymogens which are activated when proteolytically cleaved by extracellular proteinases. They are involved in processes such as embryonic development, reproduction and tissue remodelling where they breakdown the extracellular matrix. This action is also exploited by diseases processes including arthritis and metastasis. MMP7 degrades casein, fibronectin, gelatin types I, III, IV, V, and activates procollagenase. This metalloproteinase has been identified as an activator of the Notch signalling pathway, and is also involved in wound healing and the regulation of defensins in intestinal mucosa.

---

**Western Blotting** AHP1081 detects a band of approximately 28kDa in human breast, ovary and placenta cell lysates. A minimum incubation time of 1 hour is recommended with this antibody.

---

**Storage** Store at +4°C or at -20°C if preferred.

This product should be stored undiluted.

Storage in frost-free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.
