<b>Specificity</b>	<b>Rabbit anti Human Trpv2 antibody</b> recognizes transient receptor potential cation channel, subfamily V, member 2 (Trpv2). Trpv2 is an ~86 kDa, non selective calcium channel protein. It is involved in the transduction of high-temperature heat responses in neurons. Trpv2 is activated by temperatures above 52°C and is thought to be partly regulated by IGF-I, platelet derived growth factor and neuropeptide head activator. Trpv2 is expressed in skin, tongue, dorsal root ganglion, trigeminal ganglion, spinal cord and brain.
<b>Histology Positive Control Tissue</b>	Human dorsal root ganglion.
