Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

**(1) This product requires antigen retrieval using heat treatment prior to staining of paraffin sections. Sodium citrate buffer pH 6.0 is recommended for this purpose.**

**Specificity** **Rabbit anti Human CD5L antibody** recognizes the N-terminal (NT) region of human CD5L, also known as Apoptosis Inhibitor expressed by Macrophages (AIM), and SP alpha. CD5L is a soluble ~38 kDa glycoprotein produced by mature macrophages, and has been shown to support their survival and enhance phagocytic function. CD5L expression is upregulated in response to LXR/RXR heterodimer activation.

CD5L has been shown to mediate the survival of macrophages in atherosclerotic plaques.

---

**Western Blotting** AHP1169 detects a band of approximately 38kDa in human lymph node tissue lysates.
