

Datasheet: AHP1198

Description:	RABBIT ANTI SHP2 (C-TERMINAL)
Specificity:	SHP2 (C-TERMINAL)
Other names:	PTPN11
Format:	Purified
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			▪	
Immunohistology - Frozen			▪	
Immunohistology - Paraffin			▪	
ELISA			▪	
Immunoprecipitation			▪	
Western Blotting	▪			0.5 - 1.0ug/ml

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

Target Species

Human

Species Cross Reactivity

Reacts with: Mouse, Rat

N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.

Product Form

Purified IgG - liquid

Antiserum Preparation

Antisera to human SHP2 were raised by repeated immunisations of rabbits with highly purified antigen. Purified IgG prepared by affinity chromatography.

Buffer Solution

Phosphate buffered saline

Preservative Stabilisers	0.02% Sodium Azide
Approx. Protein Concentrations	IgG concentration 1.0mg/ml
Immunogen	14 amino acid peptide sequence near the carboxy terminus of human SHP2.

Synonyms	PTP2C, SHPTP2
RRID	AB_2175222
Specificity	<p>Rabbit anti SHP2 antibody recognizes src homology 2 domain containing tyrosine phosphatase (SHP2), a 68 kDa member of the protein tyrosine phosphatase family. SHP2 acts downstream of growth factor receptors and cytoplasmic protein tyrosine kinases which transduce signals from cell surface to the nucleus. The recruitment and activation of SHP2 is mediated through the binding of CD172a to its ligand CD47. SHP2 regulates a variety of cellular processes. These include transcription, embryonic development, cell growth, cell migration, differentiation, mitotic cycle, haematopoiesis and oncogenic transformation. As a result, dysregulation of the SHP2 gene has been linked to LEOPARD, Noonan and Noonan-like syndrome as well as acute myeloid leukaemia. SHP2 is ubiquitously expressed, with highest levels found in heart, brain, and skeletal muscle.</p>
Western Blotting	AHP1198 detects a band of approximately 68kDa in skeletal muscle tissue lysate.

Storage	<p>This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.</p> <p>Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.</p>

Guarantee	12 months from date of despatch
Health And Safety Information	Material Safety Datasheet documentation #10040 available at: https://www.bio-rad-antibodies.com/SDS/AHP1198 10040
