

Datasheet: AHP1271

BATCH NUMBER 170109

Description:	RABBIT ANTI HUMAN PPAR ALPHA (N-TERMINAL)
Specificity:	PPAR ALPHA (N-TERMINAL)
Other names:	PPARA
Format:	Purified
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	50 µg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			▪	
Immunohistology - Frozen			▪	
Immunohistology - Paraffin			▪	
ELISA	▪			1/8000 - 1/32000
Immunoprecipitation			▪	
Western Blotting	▪			1/500 - 1/1000
Functional Assays			▪	

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
Product Form	Purified IgG - liquid
Antiserum Preparation	Antisera to human PPAR alpha were raised by repeated immunisations of rabbits with highly purified antigen. Purified IgG prepared from whole serum by affinity chromatography.
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.01% Sodium Azide (NaN ₃)

Approx. Protein Concentrations	IgG concentration 0.98mg/ml
Immunogen	Synthetic peptide corresponding to amino acids 1-18 of human PPAR alpha.
External Database Links	<p>UniProt: Q07869 Related reagents</p> <p>Entrez Gene: 5465 PPARA Related reagents</p>
Synonyms	NR1C1, PPAR
RRID	AB_2165752
Specificity	<p>Rabbit anti PPAR alpha antibody detects an epitope within the N-terminal region of human peroxisome proliferator-activated receptor, alpha (PPARA), a member of the nuclear hormone receptor subfamily. Upon activation, PPARA forms heterodimers with retinoid X receptors (RXRs), and functions to regulate transcription of specific gene sequences. In particular, PPARA controls genes involved in the peroxisomal and mitochondrial beta oxidation pathways, fatty acid uptake, and triglyceride catabolism in the liver and skeletal muscle.</p> <p>PPARA also has anti-inflammatory and anti-proliferative effects and prevents the proatherogenic effects of cholesterol accumulation in macrophages by stimulating cholesterol efflux.</p> <p>PPARA is the main target of fibrate drugs; hypolipidemic agents used in the treatment of dyslipidemia and the prevention of cardiovascular disease. They could also be used for the treatment of type II diabetes.</p>
Western Blotting	AHP1271 detects a band of approximately 52kDa in 3T3 whole cell lysate.
Further Reading	<ol style="list-style-type: none"> Haluzík, M.M. & Haluzík, M. (2006) PPAR-alpha and insulin sensitivity. Physiol Res. 55 (2): 115-22. Lefebvre, P. <i>et al.</i> (2006) Sorting out the roles of PPAR alpha in energy metabolism and vascular homeostasis. J Clin Invest. 116 (3): 571-80.
Storage	<p>Store at +4°C or at -20°C if preferred.</p> <p>Storage in frost-free freezers is not recommended.</p> <p>This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.</p>
Guarantee	12 months from date of despatch
