

Datasheet: AHP1292GA

Description:	RABBIT ANTI BETA GALACTOSIDASE
Specificity:	BETA GALACTOSIDASE
Format:	Purified
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			▪	
Immunohistology - Frozen	▪			1/50 - 1/300
Immunohistology - Paraffin	▪			1/50 - 1/300
ELISA	▪			1/400 - 1/1600
Western Blotting	▪			1/200 - 1/500
Functional Assays			▪	

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species Bacterial

Product Form Purified IgG - liquid

Antiserum Preparation Antisera to beta-galactosidase were raised by repeated immunisations of rabbits with highly purified antigen. Purified IgG prepared from whole serum by ion exchange chromatography.

Buffer Solution Phosphate buffered saline

Preservative Stabilisers <0.1% Sodium Azide (NaN₃)

Approx. Protein Concentrations IgG concentration 1.0 mg/ml

Immunogen	Beta-galactosidase prepared from <i>E. coli</i> .
External Database Links	UniProt: P00722 Related reagents
RRID	AB_10571346
Specificity	Rabbit anti beta-galactosidase polyclonal antibody detects beta-galactosidase, an inducible enzyme that catalyzes the hydrolysis of lactose and other beta-galactosides into monosaccharides. Beta-galactosidase is a product of the <i>LacZ</i> operon, and is a homo-tetrameric protein consisting of four identical subunits of approximately 116 kDa each. beta-galactosidase is commonly used as a reporter gene in molecular biology to assess the efficiency of transfection.
Western Blotting	AHP1292GA detects a band of approximately 117kDa using <i>E. coli</i> beta-galactosidase.

Storage	This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C. Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.
Guarantee	12 months from date of despatch
Health And Safety Information	Material Safety Datasheet documentation #10040 available at: https://www.bio-rad-antibodies.com/SDS/AHP1292GA 10040
Regulatory	For research purposes only
