Specificity	<p>Rabbit anti Human PDCD4 antibody recognizes the carboxy-terminal region of programmed cell death 4 (Pdc4), a novel tumour suppressor. Pdc4 interacts with the RNA helicase eIF4A and the scaffolding protein eIF4G, two components of the translation initiation complex, and thus inhibits protein synthesis. Pdc4 has also been shown to inhibit transcription factor activator protein-1 (AP-1), which regulates several events required for cell invasion, including expression of matrix metalloproteinases and cell motility.</p> <p>Pdc4 localizes to the nucleus in proliferating cells, and its expression is modulated by cytokines in natural killer and T cells. Pdc4 expression is down regulated with tumour progression in carcinomas of the lung, colon, prostate and breast.</p>
Histology Positive Control Tissue	Mouse colon.
Western Blotting	AHP1365 detects a band of approximately 52kDa.

Storage	<p>This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.</p> <p>Avoid repeated freezing and thawing as this may denature the antibody. Storage in</p>
