

Datasheet: AHP1456

Description:	RABBIT ANTI GLI3
Specificity:	GLI3
Format:	Purified
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	50 µg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			▪	
Immunohistology - Frozen			▪	
Immunohistology - Paraffin (1)	▪			1.25ug/ml
ELISA	▪			1/6000
Immunoprecipitation			▪	
Western Blotting	▪			1/500
Functional Assays			▪	

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

(1)This product requires antigen retrieval using heat treatment prior to staining of paraffin sections.Sodium citrate buffer pH 6.0 is recommended for this purpose.

Target Species	Human
Species Cross Reactivity	<p>Reacts with: Chicken, Rat, Dog, Monkey, Mouse, Chimpanzee, Quail</p> <p>Based on sequence similarity, is expected to react with:Amphibia</p> <p>N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.</p>
Product Form	Purified IgG - liquid

Antiserum Preparation Antiserum to human GLI3 was raised by repeated immunisation of rabbits with highly purified antigen. Purified IgG was prepared from whole serum by affinity chromatography.

Buffer Solution Phosphate buffered saline

Preservative Stabilisers <0.1% Sodium Azide (NaN₃)

Approx. Protein Concentrations IgG concentration 0.5mg/ml

Immunogen Synthetic peptide corresponding to amino acid sequence 41-57 of human Gli3 protein.

RRID AB_2111920

Specificity **Rabbit anti Human GLI3 antibody** recognizes the Human Zinc Finger protein 3 (GLI-3), also known as GLI-Kruppel family member 3, a 169.8 kDa protein belonging to the GLI C2H2-type zinc finger protein of transcription factors.

GLI-3 and the related GLI-2 proteins are the primary transcription factors that mediate Sonic hedgehog (Shh) signals in the mouse, GLI-2 being primarily a transcriptional activator while GLI-3 is a transcriptional repressor. GLI-3 plays a role in the development of the limbs and brain. It is expressed in a wide range of adult tissues including the colon, lung, spleen, testis and placenta.

Defects in GLI3 are causative of a range of disease states including Pallister-Hall syndrome, type IV preaxial polydactyly, acrocallosal syndrome (ACS) and Greig cephalo-poly-syndactyly syndrome. GLI proteins are also implicated as potent oncogenes in the embryonal carcinoma cell.

Histology Positive Control Tissue Human brain, glioblastoma

Storage This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.

Guarantee 12 months from date of despatch
