# Datasheet: AHP1616 BATCH NUMBER 149046

Description:	RABBIT ANTI HUMAN LEPTIN
Specificity:	LEPTIN
Format:	Purified
Product Type:	Polyclonal Antibody
lsotype:	Polyclonal IgG
Quantity:	0.1 mg

# **Product Details**

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> .				
		Yes	No	Not Determined	Suggested Dilution
	Flow Cytometry				
	Immunohistology - Frozen				
	Immunohistology - Paraffin (1)	•			0.5ug/ml
	ELISA				0.5 - 2.0ug/ml
	Immunoprecipitation			•	
	Western Blotting	•			0.1 - 0.2ug/ml
	necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls. (1)This product requires antigen retrieval using heat treatment prior to staining of paraffin sections. Sodium citrate buffer pH 6.0 is recommended for this purpose.				
Target Species	Human				
Product Form	Purified IgG - lyophilised				
Reconstitution	Reconstitute with 0.1ml distilled water Care should be taken during reconstitution as the protein may appear as a film at the bottom of the vial. Bio-Rad recommend that the vial is gently mixed after reconstitution. For long term storage the addition of 0.09% sodium azide is recommended.				

Antiserum Preparation Antiserum to human leptin was raised by repeated immunisation of rabbits with highly purified antigen. Purified IgG was prepared from whole serum by affinity chromatography.

Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	None present
Approx. Protein Concentrations	IgG concentration 1.0mg/ml
Immunogen	Recombinant human leptin (PHP198)

Synonyms	OB, OBS
RRID	AB_2135946
Specificity	<ul> <li>Rabbit anti Human Leptin antibody recognizes human leptin, a ~16 KDa major adipose-derived hormone and member of the leptin family, which plays a key role in appetite control and the regulation of energy expenditure.</li> <li>Secreted leptin associates with proteins within the bloodstream and is transported to the brain, where it inhibits or up-regulates the activity of neuropeptides such as neuropeptide Y (NPY) and alpha-melanocyte-stimulating hormone respectively. Leptin is a recognised</li> </ul>
	marker of obesity, with a correlation between circulating levels of leptin and body fat mass, and defects in leptin production result in severe obesity. Regulators of leptin expression include insulin, cortisol, cAMP and thiazolidinediones.
ELISA	and defects in leptin production result in severe obesity. Regulators of leptin expression
ELISA Western Blotting	and defects in leptin production result in severe obesity. Regulators of leptin expression include insulin, cortisol, cAMP and thiazolidinediones. This purified human leptin antibody may be used in an ELISA with <u>recombinant human</u>
