Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

**(1)We recommend a dilution range of 1/1000 to 1/30000 for use in indirect ELISA. When coating the antibody directly on to a plate, Bio-Rad recommend a dilution range to 1/100 to 1/500.**
