

## Datasheet: AHP1666

<b>Description:</b>	RABBIT ANTI WNV CORE PROTEIN (C-TERMINAL)
<b>Specificity:</b>	WNV Core protein (C-Terminal)
<b>Format:</b>	Purified
<b>Product Type:</b>	Polyclonal Antibody
<b>Isotype:</b>	Polyclonal IgG
<b>Quantity:</b>	0.1 mg

## Product Details

**RRID** AB\_1605525

**Applications** This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

	Yes	No	Not Determined	Suggested Dilution
ELISA	▪			1ug/ml
Western Blotting	▪			1ug/ml
Immunofluorescence	▪			20ug/ml

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

**Target Species** Viral

**Product Form** Purified IgG - liquid

**Antiserum Preparation** Antiserum to human West Nile Virus core protein was raised by repeated immunisation of rabbits with highly purified antigen. Purified IgG was prepared from whole serum by affinity chromatography.

**Buffer Solution** Phosphate buffered saline

**Preservative Stabilisers** 0.02% Sodium Azide (NaN<sub>3</sub>)

**Approx. Protein Concentrations** IgG concentration 1.0mg/ml

**Immunogen** A peptide corresponding to an 15 amino acid sequence from near the carboxy terminus of West Nile Virus core protein.

<b>Specificity</b>	<p><b>Rabbit anti West Nile Virus antibody</b> recognizes the ~14 kDa core protein of West Nile Virus (WNV). WNV belongs to the Flaviviridae family which includes closely viruses such as Dengue fever, Yellow fever and Tick borne encephalitis.</p> <p>West Nile Virus particles consist of a dense core made up of the core/capsid protein encapsulating the RNA genome surrounded by a membrane envelope containing envelope and matrix proteins. Research indicates that the viral core protein contributes to the WNV-associated inflammation via apoptosis induced through the caspase-9 pathway.</p> <p>West Nile Virus is spread by mosquitos and is believed to have originated in the West Nile region of Africa but has now spread to Europe, Asia and America where it has become a significant disease affecting human and domestic animal health.</p>
<b>Western Blotting</b>	AHP1666 detects a band of approximately 14kDa in Transfected HeLa cell lysate

<b>Storage</b>	<p>Store at +4°C or at -20°C if preferred.</p> <p>Storage in frost-free freezers is not recommended.</p> <p>This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.</p>
<b>Guarantee</b>	18 months from date of despatch.
<b>Health And Safety Information</b>	Material Safety Datasheet documentation #10040 available at: 10040: <a href="https://www.bio-rad-antibodies.com/uploads/MSDS/10040.pdf">https://www.bio-rad-antibodies.com/uploads/MSDS/10040.pdf</a>
<b>Regulatory</b>	For research purposes only
