Specificity	Rabbit anti Rat metabotropic glutamate receptor 1a antibody recognizes rat metabotropic glutamate receptor 1a (mGluR1a). The metabotropic glutamate receptors have been organised into three groups. mGluR5 and mGluR1 make up group I which, when activated, stimulates phospholipase C and activates protein kinase C to hydrolyse phosphoinositide phospholipids in the cell membrane. Group I mGluRs, but not other groups, are activated by 3, 5-dihydroxyphenylglycine (DHPG).
Western Blotting	AHP1871 detects bands of approximately 125kDa (monomer) and 250kDa (dimer) on lysate from transfected HEK293 cells. This antibody has also been reported to detect bands at approximately 120kDa (reduced) and 210kD (non-reduced), in protein extracts from adult rat cerebellum.

Storage	This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C. Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.
Guarantee	12 months from date of despatch
