

Datasheet: AHP1921

Description:	RABBIT ANTI HUMAN ANNEXIN I
Specificity:	ANNEXIN I
Other names:	LIPOCORTIN I
Format:	Purified
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			▪	
Immunohistology - Frozen			▪	
Immunohistology - Paraffin (1)	▪			1/3000
ELISA	▪			
Immunoprecipitation			▪	
Western Blotting	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

(1) This product requires antigen retrieval using heat treatment prior to staining of paraffin sections. Sodium citrate buffer pH 6.0 is recommended for this purpose.

Target Species	Human
Product Form	Purified IgG - liquid
Antiserum Preparation	Antiserum to human ANXA1 were raised by repeated immunisation of rabbits with highly purified antigen. Purified IgG was prepared by affinity chromatography.
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Approx. Protein Concentrations	IgG concentration 1.0mg/ml
Immunogen	6xHis-tagged full-length recombinant human ANXA1 (NP_000691.1).

Specificity

Rabbit anti Human Annexin I antibody (AHP1921) recognizes human Annexin I (ANXA1), otherwise known as lipocortin I, a calcium-dependent phospholipid-binding protein and member of the annexin family, preferentially expressed on the cytosolic face of the plasma membrane, which acts as an inhibitor of phospholipase A2, and may exhibit anti-inflammatory activity.

Increased expression of the ANXA1 gene in hairy cell leukaemia, can be used in immunohistochemistry as a highly-sensitive diagnostic marker.

**Histology Positive
Control Tissue**

Colon carcinoma

Storage

Store at +4°C or at -20°C if preferred.

Storage in frost-free freezers is not recommended.

This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

Guarantee

12 months from date of despatch
