Specificity	<p>Goat anti Human FOXP2 antibody recognizes Forkhead box protein P2, also known as FOXP2, CAG repeat protein 44 or Trinucleotide repeat-containing gene 10 protein. FOXP2 is a 715 amino acid ~80 kDa nuclear transcriptional repressor with a role in brain and lung development.</p> <p>Mutations in the FOXP2 gene has been identified Speech-language disorder 1 (SPCH1), a disorder characterized by severe orofacial dyspraxia with speech impairment (Lai et al. 2001).</p> <p>Multiple potential isoforms of FOXP2 generated by alternative splicing have been described. Goat anti Human FOXP2 antibody (AHP2020) is expected to recognize the canonical isoform 1 and also isoforms 3 and 9. However the antibody is not expected other isoforms which lack the c-terminal region (UniProt : 015409).</p>
Western Blotting	AHP2020 detects a band of approximately 80kDa in human cerebellum cell lysates.
