<b>RRID</b>	AB_2083109
<b>Specificity</b>	<p><b>Rabbit anti Human collagen VI antibody</b> detects mammalian collagen type VI, also known as COL6A, a secreted extracellular matrix protein involved in cellular adhesion.</p> <p>Collagen type specific antibodies are dependent on non-denatured three-dimensional epitopes. Therefore, the reactivity and selectivity of this antibody will be significantly reduced if denatured and reducing conditions of SDS-PAGE and immunblotting are used.</p>
<b>Histology Positive Control Tissue</b>	Human breast or lung
<b>Storage</b>	<p>This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.</p> <p>Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.</p>
