<b>Specificity</b>	<p><b>Chicken anti Bovine interleukin-6 antibody</b> recognizes bovine interleukin-6 (IL-6), a 23.8 kDa cytokine belonging to the IL-6 superfamily.</p> <p>Bovine interleukin-6 is a multifunctional cytokine secreted by a range of cell types, in particular T lymphocytes and macrophages. IL-6 has a range of activities and includes the differentiation of B cells into Ig producing cells, differentiation of lymphocytes and of monocytes. IL-6 functions in both a pro-inflammatory role where it is an important inducer of the acute phase response and also as an anti-inflammatory myokine (<a href="#">Febbraio &amp; Pedersen 2005</a>).</p>
<b>ELISA</b>	This product may be used as a capture antibody in a sandwich ELISA together with <a href="#">AHP2380B</a> as the detection reagent. Recombinant Bovine interleukin-6 ( <a href="#">PBP021</a> ) may be used as a standard.
