<b>Specificity</b>	<b>Rabbit anti Pig erythropoietin antibody</b> recognizes erythropoietin, a secreted protein belonging to the EPO/TPO family and also known as EPO or hematopoietin.  Erythropoietin is a hormone secreted in adult mammals primarily from the kidney, and to a lesser extent the liver. In the fetus, EPO is secreted from the liver. EPO functions as a regulatory cytokine in the differentiation of erythrocytes.
<b>ELISA</b>	This product may be used as a capture antibody in a sandwich ELISA together with <a href="#">AHP2389B</a> as the detection reagent. Recombinant Pig erythropoietin ( <a href="#">PPP021</a> ) may be used as a standard.
