**Specificity** **Rabbit anti Pig interferon gamma antibody** recognizes pig interferon gamma (IFN $\gamma$ ), a 21.4 kDa type II interferon belonging to, and being the only member of, the interferon type II family. IFN $\gamma$ , produced by various cell types including T-cells and NK cells, is a cytokine involved in both innate and adaptive immunity. Porcine IFN $\gamma$  is predominantly secreted by activated T lymphocytes in response to viral infection and to infection by certain bacterial and protozoan pathogens.

**ELISA** This product may be used as a capture antibody in a sandwich ELISA together with [AHP2390B](#) as the detection reagent. Recombinant Pig interferon gamma ([PPP022](#)) may be used as a standard.
