

Datasheet: AHP2399

BATCH NUMBER 158226

Description:	RABBIT ANTI iNOS
Specificity:	iNOS
Format:	Purified
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	50 µg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Immunoprecipitation	▪			
Western Blotting	▪			1/1000

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species

Mouse

Species Cross Reactivity

Reacts with: Rat, Bovine

N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.

Product Form

Purified IgG - liquid

Antiserum Preparation

Antiserum to iNOS was raised by repeated immunisation of rabbits with highly purified antigen. Purified IgG was prepared from whole serum by affinity chromatography on Protein A.

Buffer Solution

Phosphate buffered saline

Preservative Stabilisers

0.09% Sodium Azide (NaN₃)

50% Glycerol

Approx. Protein Concentrations	IgG concentration 1.0 mg/ml
---------------------------------------	-----------------------------

Immunogen	Synthetic peptide corresponding to aa 1131-1144 of mouse iNOS
------------------	---

Synonyms	Inos1
-----------------	-------

Specificity	Rabbit anti iNOS antibody recognizes inducible nitric oxide synthase also known as iNOS and NOS type II. This enzyme triggers the synthesis of the second messenger molecule, nitric oxide (NO), by immune cells such as macrophages in response to pathogen exposure. Inducible nitric oxide synthase also becomes activated in response to interleukin 1 beta and tumor necrosis factor alpha (Lowenstein and Padalko, 2004). In endothelia, the molecule is produced by eNOS (endothelial nitric oxide synthase) where it acts as a vasodilator and platelet inhibitor while in the brain NO is produced by nNOS (neuronal nitric oxide synthase) and functions as a neurotransmitter.
--------------------	--

Western Blotting	Rabbit anti iNOS recognizes a band of ~130 kDa by Western Blot
-------------------------	--

Storage	Store at +4°C or at -20°C if preferred. Storage in frost-free freezers is not recommended. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.
----------------	---

Guarantee	12 months from date of despatch
------------------	---------------------------------

Health And Safety Information	Material Safety Datasheet documentation #10049 available at: https://www.bio-rad-antibodies.com/SDS/AHP2399 10049
--------------------------------------	--

Regulatory	For research purposes only
-------------------	----------------------------
