<b>Approx. Protein Concentrations</b>	IgG concentration 1.0 mg/ml
<b>Immunogen</b>	Bromodeoxyuridine conjugated to KLH
<b>Specificity</b>	<p><b>Rabbit anti BrdU antibody</b> recognizes bromodeoxyuridine (known as BrdU or BrdUrd). BrdU is a synthetic thymidine analog, which when added to cell culture media can be incorporated into the DNA of replicating cells as a substitute for thymidine. This characteristic combined with the ease of detecting incorporated BrdU with the help of anti-BrdU antibodies has resulted in establishing BrdU as a key tool for the visualization of cells in the S-Phase of the cell cycle.</p> <p>BrdU is also commonly used <i>in vivo</i> for monitoring cell proliferation in model systems; BrdU can be administered via intraperitoneal injection, subcutaneous osmotic pump implants (<a href="#">Tesfaiqzi et al. 2004</a>) or in drinking water (<a href="#">Moser et al. 2004</a>).</p>
<b>Storage</b>	<p>Store at -20°C only.</p> <p>Storage in frost-free freezers is not recommended.</p> <p>This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.</p>
