

## Datasheet: AHP2436

<b>Description:</b>	RABBIT ANTI ARNT
<b>Specificity:</b>	ARNT
<b>Format:</b>	Purified
<b>Product Type:</b>	Polyclonal Antibody
<b>Isotype:</b>	Polyclonal IgG
<b>Quantity:</b>	50 µl

## Product Details

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/500 - 1/2000

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

### Target Species

Human

### Species Cross Reactivity

Reacts with: Mouse

Based on sequence similarity, is expected to react with: Rat

**N.B.** Antibody reactivity and working conditions may vary between species.

### Product Form

Purified IgG - liquid

### Antiserum Preparation

Antiserum to ARNT was raised by repeated immunization of rabbits with highly purified antigen. Purified IgG was prepared from whole serum by affinity chromatography.

### Buffer Solution

Phosphate buffered saline

### Preservative

0.02% Sodium Azide

### Stabilisers

50% Glycerol

### Immunogen

Recombinant human ARNT

### Synonyms

BHLHE2

<b>Specificity</b>	<b>Rabbit anti ARNT antibody</b> recognizes aryl hydrocarbon receptor nuclear translocator (encoded by the gene ARNT), also known as hypoxia-inducible factor 1-beta (HIF1-beta) or bHLHe2. ARNT is a member of the bHLH PAS (basic helix-loop-helix Per-ARNT-Sim) family of transcription factors. ARNT forms complexes with either hypoxia-inducible factor 1-alpha (HIF-1 alpha) or aryl hydrocarbon receptor (AhR), ARNT is involved in the adaptive response to stress caused by dioxins and hypoxia.
<b>Western Blotting</b>	Rabbit anti ARNT antibody detects a band of approximately 87 kDa in cell lysates under reducing conditions. Rabbit anti ARNT antibody also appears to detect a modified form of ARNT at a higher molecular weight.
<b>Storage</b>	Store at -20°C Storage in frost-free freezers is not recommended. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.
<b>Shelf Life</b>	12 months from date of despatch
<b>Health And Safety Information</b>	Material Safety Datasheet documentation #10049 available at: 10049: <a href="https://www.bio-rad-antibodies.com/uploads/MSDS/10049.pdf">https://www.bio-rad-antibodies.com/uploads/MSDS/10049.pdf</a>
<b>Regulatory</b>	For research purposes only
