

Datasheet: AHP2467

Description:	RABBIT ANTI GBL
Specificity:	GBL
Format:	Purified
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	50 µl

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/500 - 1/2000

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
Species Cross Reactivity	<p>Reacts with: Mouse</p> <p>Based on sequence similarity, is expected to react with:Rat</p> <p>N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.</p>
Product Form	Purified IgG - liquid
Antiserum Preparation	Antiserum to GBL was raised by repeated immunization of rabbits with highly purified antigen. Purified IgG was prepared from whole serum by affinity chromatography.
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	<p>0.02% Sodium Azide</p> <p>50% Glycerol</p>
Immunogen	Recombinant human GBL

External Database Links	UniProt: Q9BVC4 Related reagents
	Entrez Gene: 64223 MLST8 Related reagents
Synonyms	GBL, LST8
Specificity	Rabbit anti GBL antibody recognizes GBL, also known as G beta-like protein, mTOR-associated protein LST8, mLST8, target of rapamycin complex subunit LST8 and TORC subunit LST8. GBL is a common subunit of both the mTOR complex 1 and the mTOR complex 2, and is necessary for activation of the mTOR kinase.
Western Blotting	Rabbit anti GBL antibody detects a band of approximately 40 kDa in cell lysates and tissue lysates under reducing conditions
Storage	Store at -20°C Storage in frost-free freezers is not recommended. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.
Guarantee	12 months from date of despatch
Health And Safety Information	Material Safety Datasheet documentation #10049 available at: https://www.bio-rad-antibodies.com/SDS/AHP2467 10049
Regulatory	For research purposes only
