

Datasheet: AHP2658 **BATCH NUMBER 141615**

Description:	RABBIT ANTI NFkB p105 (pSer907)		
Specificity:	NFkB p105 (pSer907)		
Format:	Purified		
Product Type:	Polyclonal Antibody		
Isotype:	Polyclonal IgG		
Quantity:	50 μl		

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.biorad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	•			1/500 - 1/2000

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human	
Product Form	Purified IgG - liquid	

Antiserum Preparation Antiserum to NFkB p105 (pSer907) was raised by repeated immunization of rabbits with

highly purified antigen. Purified IgG was prepared from whole serum by affinity

chromatography.

Buffer Solution Phosphate buffered saline **Preservative** 0.02% Sodium Azide **Stabilisers** 50% Glycerol **Immunogen**

Phospho specific-peptide corresponding to residues surrounding serine 907 of human

NFkB p105

Specificity

Rabbit anti NFkB p105 (pSer907) antibody recognizes human nuclear factor NF-kappa-B (NFkB) p105 subunit, also known as DNA-binding factor KBF1, EBP-1 or nuclear factor of kappa light polypeptide gene enhancer in B-cells, when phosphorylated at serine 907.

NFkB p105 is a large precursor protein that is cleaved at its C-terminus (which mainly contains ankyrin repeats) by the ubiquitin/proteasome pathway into the NFkB p50 subunit. The p50 subunit interacts with members of the Rel protein family to form transcription factors. The NFkB pathway plays a critical role in mediating immune responses after infection and has been implicated in a variety of diseases ranging from autoimmune disorders to cancer.

NFkB is phosphorylated at serine 907 by GSK3-beta (Demarchi et al. 2003).

Storage

Store at -20°C

Storage in frost-free freezers is not recommended.

This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

Guarantee

12 months from date of despatch
