

## Datasheet: AHP2726

<b>Description:</b>	RABBIT ANTI SRC (pTyr419)
<b>Specificity:</b>	SRC (pTyr419)
<b>Format:</b>	Purified
<b>Product Type:</b>	Polyclonal Antibody
<b>Isotype:</b>	Polyclonal IgG
<b>Quantity:</b>	50 µl

## Product Details

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/500 - 1/2000

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

<b>Target Species</b>	Human
-----------------------	-------

<b>Product Form</b>	Purified IgG - liquid
---------------------	-----------------------

<b>Antiserum Preparation</b>	Antiserum to SRC (pTyr419) was raised by repeated immunization of rabbits with highly purified antigen. Purified IgG was prepared from whole serum by affinity chromatography.
------------------------------	--

<b>Buffer Solution</b>	Phosphate buffered saline
------------------------	---------------------------

<b>Preservative</b>	0.02% Sodium Azide
<b>Stabilisers</b>	50% Glycerol

<b>Immunogen</b>	Phospho specific-peptide corresponding to residues surrounding tyrosine 519 of human SRC
------------------	--

<b>Synonyms</b>	SRC1
-----------------	------

---

<b>Specificity</b>	<b>Rabbit anti SRC (pTyr419) antibody</b> recognizes proto-oncogene tyrosine-protein kinase Src, also known as SRC1, when phosphorylated at tyrosine 419. SRC belongs to the SRC family of protein tyrosine kinases that mediate signal transduction of specific receptor pathways ( <a href="#">Thomas and Brugge 1997</a> ). Phosphorylation residues in human SRC are commonly referred to and named according to the chicken SRC protein ( <a href="#">Boggon and Eck 2004</a> ). Phosphorylation of SRC at tyrosine 419 (tyrosine 416 in chicken) in the activation loop is essential for its full activation ( <a href="#">Roskoski 2005</a> ).
