

Datasheet: AHP2797Z

Description:	RABBIT ANTI HUMAN CD265 (SOLUBLE):Preservative Free
Specificity:	CD265 (SOLUBLE)
Other names:	sRANK
Format:	Preservative Free
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
ELISA	▪			0.5 ug/ml - 2.0 ug/ml
Western Blotting	▪			0.1 ug/ml - 0.2 ug/ml

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
Product Form	Purified IgG - lyophilized
Reconstitution	Reconstitute with 0.1 ml PBS + 0.1% BSA

Antiserum Preparation Produced from sera of rabbits immunized with recombinant human sRANK and purified by affinity chromatography

Buffer Solution Phosphate buffered saline

Preservative Stabilisers None present

Carrier Free Yes

Endotoxin Level < 0.1 ng/μg of protein (< 1 EU/μg)

Approx. Protein Concentrations	IgG concentration 1.0 mg/ml after reconstitution
Immunogen	<i>E. coli</i> derived recombinant human soluble CD265 containing the TNFR-homologous, cysteine-rich portion of the extracellular domain of RANK receptor
External Database Links	<p>UniProt: Q9Y6Q6 Related reagents</p> <p>Entrez Gene: 8792 TNFRSF11A Related reagents</p>
Synonyms	RANK
Specificity	<p>Rabbit anti Human CD265 (soluble) antibody, recognizes CD265 also known as RANK, TNFRSF11A, osteoclast differentiation factor receptor and receptor activator of NF-κB. This antibody recognizes the soluble TNFR homologous cysteine rich portion of the extracellular domain of the CD265 receptor.</p> <p>CD265 has major functions in bone remodeling, signaling to regulate osteoclast formation, activation and survival in normal bone modeling and remodeling in an array of pathological conditions characterized by upregulated bone turnover (Boyce & Xing 2008). CD265 signaling is induced upon binding of its ligand RANKL which results in the recruitment of one of several adapter proteins including TRAF6. This can result in the activation of the NF-κB, MAPK or c-Src signaling pathways (Nagy & Penninger 2015).</p> <p>Beyond its crucial function in osteoclastogenesis, CD265 has also been implicated in other physiological processes including immunotolerance, organogenesis of the immune system and osteoimmunology (Sigl et al. 2016).</p>
Storage	<p>Prior to reconstitution store at -20°C. After reconstitution store at -20°C.</p> <p>This product should be stored undiluted. Storage in frost-free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.</p>
Guarantee	12 months from date of despatch
Health And Safety Information	Material Safety Datasheet documentation #10294 available at: https://www.bio-rad-antibodies.com/SDS/AHP2797Z 10294
Regulatory	For research purposes only
