

Datasheet: AHP2806Z

Description:	RABBIT ANTI HUMAN INTERLEUKIN-17B:Preservative Free
Specificity:	IL-17B
Format:	Preservative Free
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
ELISA	▪			0.5 ug/ml - 2.0 ug/ml
Western Blotting	▪			0.1 ug/ml - 0.2 ug/ml

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
Product Form	Purified IgG - lyophilized
Reconstitution	Reconstitute with 0.1 ml distilled water
Antiserum Preparation	Produced from sera of rabbits immunized with recombinant human interleukin-17B and purified by affinity chromatography
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	None present
Carrier Free	Yes
Endotoxin Level	< 0.1 ng/µg of protein (< 1 EU/µg)
Approx. Protein	IgG concentration 1.0 mg/ml after reconstitution

Concentrations

Immunogen *E. coli* derived recombinant human interleukin-17B

Synonyms IL20, NIRF, ZCYTO7

Specificity Rabbit anti Human interleukin-17B antibody recognizes interleukin-17B (IL-17B) also known as cytokine Zcyto7, IL-20 and neuronal interleukin-17-related factor.

IL17B is a member of the IL-17 superfamily of cytokines and is expressed in a wide range of tissues and cell types including human pancreas, small intestine, chondrocytes and neurons. There is limited information about the biological functions of IL17B, but it is known to act as a proinflammatory cytokine inducing TNF α and IL-1 β production in THP-1 cells and stimulating neutrophil infiltration ([Bie et al. 2017](#), [Liu et al. 2020](#)). IL-17B has also been reported to induce the migration of CXCR4+ or CXCR5+ germinal center B cells to CXCL12 and CXCL13 ([Bie et al. 2017](#)).

Storage Prior to reconstitution store at -20°C.
After reconstitution store at -20°C.

This product should be stored undiluted. Storage in frost-free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

Guarantee 12 months from date of despatch
