<b>Specificity</b>	<p><b>Rabbit anti Human interleukin-36 gamma antibody</b>, recognizes interleukin-36 gamma (IL-36 gamma) also known as IL-1 related protein 2, IL-1 epsilon, IL-1 family member 9 and IL-1 homologue 1.</p> <p>IL-36 gamma is a member of the IL-1 superfamily of cytokines and elicits its biological function through the IL-1 receptor-related protein 2. Activation of this receptor can lead to the activation of the NF-κB, MAPK, JNK and ERK signaling cascades (<a href="#">Bao et al. 2020</a>). In this way, IL-36 gamma is able to act as a proinflammatory cytokine, with the exact biological function dependent on the type and site of inflammation (<a href="#">Ding et al. 2017</a>).</p>
<b>Storage</b>	<p>Prior to reconstitution store at -20°C.  After reconstitution store at -20°C.</p> <p>This product should be stored undiluted. Storage in frost-free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.</p>
